

**REMARKS**

A post-Notice of Allowance review of this application revealed two errors in the specification and one error in the drawings. This Rule 312 Amendment is presented to address and correct those errors. With respect to the specification errors, it was noted that the logic levels of the signal had been inaccurately/oppositely described. Correction has been made above. With respect to the drawing error, it was noted that an incorrect voltage reference notation was used with respect to a ground connection in Figure 2B. Correction is as noted above and in the attached marked-up drawing sheet. A replacement sheet for Figure 2B with the correction is also included.

Respectfully submitted,

JENKENS & GILCHRIST,
